A SUGGESTION

Why look any farther for a present for Christmas, Easter, Birthday, Valentine, Wife, Mother, Sis, Sweetheart or even Dad? Send them a Peony, Iris or a Hemerocallis. Just send me the order and I will send them along at the right season for planting.

PEONY CULTURE

The peony is one of the hardiest of all plants. It will grow any place where you can grow vegetables, except it does better in a climate where it freezes in the winter.

After you choose a place where you want to grow your peonies, then dig up the ground to a depth of about one foot and break up all the clods and rake it down till it is good and mellow. This should be done some time before you want to plant your plants. Remember to keep far enough away from large trees so that the roots will not starve your peonies. When you receive your peony roots from the grower open them soon and see to it that they are kept moist until you plant them. If they are beginning to shrivel when you open the package, then soak them for a day or two in a bucket of water. This should bring them back to a nice plump condition and they will be ready to set out.

When you set your peonies out be sure to have the eyes about two inches below the level of the ground around the plants. If they are planted too deep they will be about two more years getting to the blooming stage. Be sure to pack the ground down firmly with your hands around the roots when you plant a peony. When you have the dirt all back except the last inch you may pour in a bucket of water if you wish, then let the water all settle away, then finish filling the hole with loose dirt. If the season is average and you have plenty of natural moisture it is not really necessary to water them down when you plant them. Just do not let them dry out too much the first season. Good cultivation at all times is best.

Peonies may be planted any time after the first of September. That is their dormant season and like other plants they do not like to be moved during their growing season. The best size root to buy is the three to five eye or standard division as it is called. A great big root may do better the first spring after it is planted, but after the second season the standard division will give you the best bloom of any.

Plant your peony roots about three and one-half feet apart and do not crowd them with any other plants. Like most plants they like to be grown alone. If you want good blooms next season, leave the foliage or at least all the foliage you can on the plant all summer. This foliage gives the root the life it needs to make bloom next year.

BIGGER IRIS

SPURIA - This group of Iris is one of the finest of all Iris. They lend themselves beautifully to bouquets and corsages. Their stout upright foliage and flowerspikes are a delight to all just as the peony season is closing. They bring bright yellow, blue and bronze to the peony field. Spuria roots are shipped damp and may be included right along with the peony shipment. Plant them about three inches deep. S and F after the name stand for standard and fall.

	Each
Bronzspur-brownish tan.....	\$ 1.00

Hazy Hills-blue bicolor.....	1.50
Shelford's Giant-S.white, F.yellow.....	1.00
Saugatuck-lavender with brown markings.....	1.00
Sunny Day-large bright yellow.....	1.00

BIGGER HEMEROCALLIS

We have a large number of varieties of Hemerocallis growing in our fields. Many of them are just on trial but a few are in large enough numbers to be divided and offered for sale in 1952. If you have never grown hemerocallis you have missed a lot of fun as well as a lot of flowers in your garden all summer long. The Hemerocallis season is not Spring, Summer or Fall. It is rather a warm weather season. In fact, you can by selection of the right varieties have a lot of bloom from the first of May to freeze up in the fall. Some varieties bloom early, some mid-season, and some late. Then, there are some rebloomers that bloom twice and others that just seem to bloom all season after they once start. A few Hems and Spuria Iris will add materially to the blooming season of any peony collection. They add the yellows and blues that are so short in the peonies.

BIGGER PEONIES

The following varieties are all my own originations. I have tested all of them for many years and I believe they are all worthy of a trial in your garden. I do not have very large stocks of them and there are not very many plants of some to be sent out this year.

AERIE - 1949 -

Very light pink to white, cup shaped, semi-double, 30 inches tall. Almost every flower has an eagle's nest of petals built up in the center with a collar of yellow stamen surrounding it. Very good substance and medium green foliage.....each.....\$ 5.00

ANNE BIGGER - 1945 -

This very large medium pink flower is very smooth in color and always opens. Very pretty buds, medium dark green foliage and strong stems. each.....\$ 6.00

JAYHAWKER - 1949 -

This fine seedling of Mons. Jules Elie is very much like its parent except it is very much lighter in color. It is a full double bomb type light pink. The bud, guards and bomb are all the same smooth shade of light pink. The bomb holds its shape very well as the flower ages. The stems are tall and stiff with smooth, clean light green foliage.....each.....\$10.00

KANSAS - 1940 -

Early bright red, held high on one of the strongest stems in the field. The dark green foliage is clean and the plant has always been healthy. The flower is full double with a few hidden stamens. Kansas is very good both as a show and cut flower. It won the American Home Achievement Medal in 1942, Best flower of National show in 1950 and many other awards.....each.....\$10.00

KAW VALLEY - 1944 -

Bright red full double with a few hidden stamens. It holds its color better than many others in the bright sun. The fine stems are about thirty to thirty-six inches tall.....each.....\$ 6.00

MISS DAINTY - 1949 -

Double full rose type, slightly cupped center, medium to large flower. The beauty of this variety is in its dainty petals and coloring. White shaded very delicate pink. Very fragrant. The foliage is dark green and tough. Late and thirty-six inches tall.....each.....\$ 6.00

PINK WONDER - 1950 -

Full Double with a few hidden stamen. The large bright pink flowers are born in great profusion. The base of the petals are slightly darker giving the flower an added brightness. The stems are strong and about thirty-inches tall. The foliage is clean and medium dark green.....each.....\$10.00

PRAIRIE BELLE - 1945 -

A very large full double creamy pink flower with enough stamens to make it appear yellow in the field. The petals are long and narrow and it never has any trouble opening even in bad weather. Dark green foliage - midseason.....each.....\$ 6.00

PLAINSMAN - 1949 -

Very light flesh to white Jap with yellow stamenoids and white carpels. Heavy medium green foliage and a heavy bloomer with very good substance. each.....\$ 6.00

SHAWNEE CHIEF - 1940 -

Midseason cut flower, red. This has been one of the best cut flower varieties I have ever grown. It will open well from the field or cold storage. The established plants are about thirty inches tall and each one will furnish about twelve to twenty stems to cut. In the bud Shawnee Chief looks like a rose. With me it has never waterlogged. each.....\$ 2.00

SNOW MOUNTAIN - 1946 -

Tall strong stemmed, bomb type double, opening creamy white, fading to pure white. The bloom grows into a mountain of snow white petals. Foliage medium dark green, clean and healthy. Buds open without trouble. Flower very similar to Mons. Jules Elie. Midseason. each.....\$10.00

WESTERNER - 1942 -

Light pink Jap and one of the finest. The guards are very firm and are held cup shaped. The center is filled with a very firm cushion of yellow stamens and does not feather. The plant is very clean, tall and always holds the flower up for you to look at. It is one of the largest Japs. Winner of the American Home achievement Medal at Boston in 1947. each \$ 5.00

NEW BIGGER PEONIES

Something new for fifty-two

The following two varieties are being introduced for your approval this year. I have grown them for a good many years and like them very much. Both are good bloomers and to date I find they bloom every year regardless of the season.

CARRARA - (59-37) White Jap, White bud, white guard petals, white stamens edged with yellow and white pistils. Flower opens white and stays white. A fine white Jap on a good plant that grows well to a height of about thirty-six inches. "Net" each \$10.00

MID-AMERICA - (52-37) A fine full rose double. The color is a smooth shade of medium pink with a slight lavender cast. The flower is cup shaped with a collar of petals around the middle of the flower that are white intermixed or tipped with the major color of the flower. The center of the cup tends to be white also. This is a good cut flower and keeps well in cold storage. Won honorable mention as a seedling at Boston. "Net" each \$10.00

TERMS

Cash with order, please. All prices and listings are subject to prior sale and other conditions not under my control. This list cancels all previous lists.

I guarantee all plants sent out under name to be true to name and in a good growing condition when they leave me, but I will not be responsible for more than the purchase price.

Three of any variety except those marked "Net" may be had for two and one-half times the price of one. All orders for \$5.00 or more will be prepaid in the U.S.A. Please add 35 cents for postage on smaller orders. I send out three to five eye divisions. Kansas customers will please add 2 per cent on all retail orders.

Please send me your list of wants. If I do not have them growing I am sure I can get them for you. Remember - Come and see the flowers next spring.
